PROJECTS

Cloud-Based CI/CD Pipeline Automation

Tools : Jenkins, Docker, AWS EC2, GitHub, Linux (Ubuntu)

Designed and implemented an automated CI/CD pipeline for a React application using Jenkins and Docker. Configured Jenkins to automatically pull source code from GitHub, build Docker images, and deploy updated containers on an AWS EC2 instance. Reduced manual deployment efforts and improved release reliability.

Dockerized URL Monitoring System

Tools : Docker ,AWS EC2 , Node.js , MongoDB, GitHub

Developed a web-based monitoring system that periodically checks the availability and response time of multiple websites. Containerized the application using Docker and deployed it on AWS EC2. Implemented automated status tracking and alert generation for website downtime.
